

To our Patients,

We want to assure you that we are doing everything possible to keep you safe as well as our staff safe.

In order to minimize the risk of the Covid-19 exposure we are putting the following protocols in place for our office:

Our exam and testing rooms will be disinfected between each patient. Our waiting room has been spread out with some chairs eliminated in order to keep social distancing and at a minimum capacity. We are monitoring our staff daily with temperature and symptom checks to make sure they stay well. Our staff will be wearing masks for your protection. We are monitoring patients, taking temperatures and checking symptoms. We ask that you come into your appointment by yourself unless you are in need of special help. We ask that your driver wait in the car for you.

We are also asking that you wear a mask into the office. If you do have someone that has to come into the office with you, they will need to bring a mask and will be screened for COVID-19 symptoms as well. If you are not feeling well and have any COVID-19 symptoms we ask that you stay at home and reschedule your appointment.

We are asking all patients to make an appointment for the Lab/Doctor, no walk-ins.
